CONSTRUCTION STATUS OF SOVIET SINGLE SILO ICBM SITES

25X1

Only two of the ICBM complexes containing single silos were covered in their entirety on fair quality photography by [redacted] Two other complexes were partially covered. 25X1

The current state of construction of those sites observed is shown on the status sheets. Highlights of the scanty coverage included the identification of two new Type III-C sites and a second interferometer at the Uzhur ICBM Complex; the identification of a new group of Type III-D sites at the Gladkaya ICBM Complex; and the possible presence of a silo cover at site F-2, Gladkaya. This is the first Type III-D site at which the tentative identification of a cover has been made.
